FOR: APPARATUS AND METHOD FOR CONTROLLING
RECORDING AND REPRODUCTION IN DIGITAL
VIDEO CASSETTE TAPE RECORDER

SUPPLEMENTAL DECLARATION OF TAE SEOK YANG

This Supplemental Declaration is supplemental to the Combined Declaration and Power of Attorney filed on April 13, 1994, which was filed in relation to U.S. application 08/227,281. This Supplemental Declaration is also supplemental to the Combined Reissue Declaration and Declaration of Attorney filed on July 20, 1998, the Supplemental Reissue Declaration filed on December 20, 1999, and the Supplemental Declaration For Reissue Patent Application To Correct "Errors" Statement filed on June 4, 2002, each of which was filed in relation to U.S. reissue application 09/118,824.

I, Tae Seok Yang, hereby declare as follows:

My name, residence and citizenship are indicated below.

I am a named co-inventor of U.S. RE38,868, which reissued on November 8, 2005 from reissue application 09/118,824 ("the '824 Reissue Application").

RE38,868 is a reissue of U.S. Patent 5,587,789 ("the '789 patent"), which issued on December 24, 1996 from U.S. patent application 08/227,281 ("the '281 Application"), of which I also am a named co-inventor.

A. The Declaration Related to the '281 Application

On or before April 6, 1994, I received a draft of the '281 Application from Mr. Gi-Up Cho of LG Electronics Inc. ("LGE") in both the Korean and English language, which I reviewed and understood. Mr. Cho also informed me that a Combined Declaration and Power of Attorney ("Declaration") was required for the '281 Application, and he generally explained its content to me. After receiving his explanation, I authorized Mr. Cho to have my name signed on my behalf at the end of the Declaration. Upon information and belief, the executed document was filed in the U.S. Patent and Trademark Office ("USPTO") on April 13, 1994. By authorizing Mr. Cho to have my name signed on my behalf, I did not intend to deceive the USPTO.

B. The Declarations Related to the '824 Reissue Application

On May 19, 1998, I understood and personally signed the Combined Reissue Declaration and Power of Attorney ("Reissue Declaration") related to the '824 Reissue Application. Upon information and belief, the Reissue Declaration was filed in the USPTO on July 20, 1998.

On December 10, 1999, I understood and personally signed the Supplemental Reissue Declaration related to the '824 Reissue Application. Upon information and

belief, the Supplemental Reissue Declaration was filed in the USPTO on December 20, 1999. By the time I signed the Supplemental Reissue Declaration, I was no longer employed by LGE.

On or before May 28, 2002, I received a telephone call from Mr. Yeo Han Yun of LGE, who informed me that a Supplemental Declaration For Reissue Patent Application To Correct "Errors" Statement (37 CFR 1.175) ("Second Supplemental Declaration") was required for the '824 Reissue Application. Mr. Yun explained to me the substance of the Second Supplemental Declaration over the telephone in the Korean language. I told Mr. Yun that the Second Supplemental Declaration was correct, and I authorized Mr. Yun to have my name signed on my behalf at the end of the document. Upon information and belief, the executed document was filed in the USPTO on June 4, 2002. By authorizing Mr. Yun to have my name signed on my behalf, I did not intend to deceive the USPTO.

I have re-read and re-reviewed all of the statements made in each of the above-identified declarations, copies of which are attached hereto as Exhibits A-D, and I reaffirm that all of the statements made therein of my own knowledge are true, and that all statements made therein on information and belief are believed by me to be true.

I further declare that all statements made herein of my own knowledge are true, and that all statements made on information and belief are believed by me to be

COMBINED REISSUE DECLARATION AND POWER OF ATTORNEY

As the below named inventors, we hereby declare as follows:

That our names, residence and citizenship are indicated below;

That we have reviewed and understand the contents of the attached reissue application including original claims 1-22 and newly submitted claims 23-58;

That we acknowledge the duty to disclose information which is material to the examination of this application in accordance with Title 37, Code of Federal Regulations, Section 1.36(a);

That we verily believe that we are the original, first and only joint inventors of the invention described and claimed in United States Patent No. 5,587,789 entitled "APPARATUS AND METHOD FOR CONTROLLING RECORDING AND REPRODUCTION IN DIGITAL VIDEO CASSETTE TAPE RECORDER" and in the foregoing specification for which invention we respectfully solicit a reissue patent;

Attorney Docket No. 2922-102F

That we do not know and do not believe that the same invention was ever known or used before our invention or discovery thereof; or patented or described in any printed publication in any country before our invention or discovery thereof, or more than one (1) year prior to the filing of our original application for United States Letters Patent No. 5,587,789 of which that is an application for reissue; or in public use or on sale in the United States of America for more than one (1) year prior to the filing of the original application; that the invention has been patented or made the subject of an inventor's certificate issued before the date of the original application in any country foreign to the United States of America on an application filed by us or our legal representatives or assignees more than twelve (12) months prior to said original application and that no application for patent or inventor's certificate have been filed by us or our legal representatives or assignees in any country foreign to the United States of America before the application of the original patent;

That we verily believe that there are errors in the original patent which make such original patent partially inoperative by reason of claiming less than we had a right to claim and that all errors being corrected in the reissue application up to the time of filing of this declaration arose without any deceptive intent

That, more specifically, with respect to independent apparatus claim 1, the errors include specific recitation of the detailed functions of the frame recording position controlling means and the frame removing means; that, more specifically, with respect to independent apparatus claim 11, the errors include specific recitation of the detailed functions of the frame position information recording means with

respect to index information; that, more specifically, with respect to independent method claims 19, the errors include specific recitation of the details of the calculating step; and that, more specifically, with respect to independent method claim 21, the errors include specific recitation of the details of the recording step with respect to index information;

That for this reason, there are errors in the original patent claims which rendered the original patent partially inoperative by failing to broadly claim the aspects of our invention.

Thus, newly submitted independent claims 23, 33, 42, and 52 are presented to cure the inadequacies of present claims 1-22. Claims 24-32, 34-41, 43-51, and 53-58 are all directly or indirectly dependent from claims 23, 33, 42, and 52, respectively. Each of these dependent claims is necessary to recite other features of the invention or to further define the basic elements of the invention recited in the independent claims. Claims 23-58 are not equivalent in scope to any of claims 1-22.

Upon review of the prior art cited during the examination of the original application, and the further documents submitted herewith, we do not believe that any of the documents disclose or suggest the invention as set forth in any of the claims 1-58, and that we are entitled to the more comprehensive protection represented by newly offered claims 23-58. As such, we believe that all of the claims 23-58 are necessary to protect our invention with claims of varying scope, and to correct for the insufficiencies of claims 1-22.

Applicants hereby offer to surrender the original Letters Patent No. 5,587,789.
